

BACK SUPPORT

No. 1490

Function: The ActiveColor® Back Support facilitates the spine and prevents dislocations in case of heavy burdens. Two dorsally integrated splints ensure additional back stability. With variable Velcro fastening for individual compression regulation.

Colours: skin-tone, black

Indications: Back pain, lumbago, strains

Sizes: Circumference of waist
small – 65-80 cm
medium – 80-95 cm
large – 95-110 cm
x-large – 110-125 cm

1 cm = 0,3937 inch

WRIST SUPPORT

No. 1410

Function: Wrist complaints can arise both from a one-off burden (e.g. a strain) or also as a result of constant overstraining (carpal tunnel syndrome). The ActiveColor® Wrist Support with its variable Velcro fastening provides support and offers individually adjustable compression.

Colours: white, red, skin-tone, blue, black

Indications: Prevention of overstraining, strains, sprains, irritations due to fatigue

Sizes: Circumference of wrist
medium – up to 19 cm
large – 19-21 cm

1 cm = 0,3937 inch

STABILO COLOR®

As a further colourful alternative to self-therapy

No. 520 000 StabiloColor®

Function: Permanently elastic support which protect, support and look good. Skin-friendly and breathable. Due to their fresh colours they avoid the impression of illness and disability.

Nr. 521 000 StabiloColor® haft (cahesive wrapping)

Self-adhesive version of the StabiloColor® with adhesive latex microdot coating.

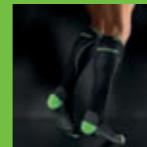

Composition: 88 % Cotton, 11 % polyamide and 1 % polyurethane, Extension approx 80 %

Colours: green, blue, red, orange, black

Widths: 4 cm, 6 cm, 8 cm, 10 cm
Length: 5 m (16.4 inches) outstretched

1 cm = 0,3937 inch

SPORTS COMPRESSION STOCKING

No. 1310 SP

Function: The ActiveColor® sports compression stocking was developed specifically for runners. Its even compression pressure increases blood circulation and venous performance under load and reduces the muscle regeneration period.

Colours: black/green

Widths: Circumference of calf
Size II – 25-31 cm
Size III – 31-38 cm
Size IV – 38-44 cm
Size V – 44-50 cm

1 cm = 0,3937 inch

active COLOR®

STABILISING JOINT SUPPORTS FOR FREE TIME AND WORK

For overstrained joints and muscles

BORT has developed the ActiveColor® Supports specifically for the simple, non-complex self-therapy of general joint complaints. The ActiveColor® Support adapts ideally to natural movement without restrictions. Additionally, the compression facilitates the joint in its physiological motion sequence.

Overview of the advantages:

- The ActiveColor® Supports facilitate the joint without disturbing the motion sequence.
- The ActiveColor® Supports are coloured. 4 modern colours enable good matching with all items of attire.
- Each support is available with a breathable storage bag for use when out (except Article 1490).
- During movement, there is practically no risk when using the ActiveColor® Support.

The support ought not be worn during periods of rest, e.g. overnight. In case of permanent discomfort, you must consult a physician.

THUMB/ HAND SUPPORT

No. 1470

Function: The ActiveColor® Thumb/Hand Support serves to stabilise the wrist. The thumb opening ensures that the support is kept in place without slipping, also if the hand and arm are used intensely.

Colours: skin-tone, blue, black

Indications: Prevention of overstraining, strains, sprains, irritations due to fatigue

Sizes: Circumference of wrist
small – up to 15 cm
medium – 15-17 cm
large – 17-19 cm
x-large – 19-21 cm

No. 1470 SP
