BORT Generation
For better mobility for the aged
Remain on the move and mobile.
BORT Generation – for a better quality of life for the elderly

Life can be so good – especially as we age, maintenance of freedom of movement is the basis which enables further active participation in life.

The BORT Generation series products support the elderly to master the requirements of everyday life, enabling them to maintain independency and their own mobility.

Participation in social life remains. BORT Generation makes an important contribution to the preservation of the quality of life.

Remain agile.
With BORT Generation.
With respect to their handling and product design, BORT Generation products were developed specifically for people with restricted gripping ability or movement impairments.

They are easy to fit and take off and pleasant and comfortable to wear. They stabilise and relieve the joints, enabling the users safe, painless and independent movement.

BORT Generation.
More wellbeing. Day by day.
**BORT Generation Thumb Splint**

Stabilising splint - also walking aids easy to hold

**INNOVATIVE CORD LACING SYSTEM**

Easy and safe handling using little force for circumferential closure; compensates reduced gripping strength for the elderly.

**STABILITY**

Can be put on in one step for stabilising the metacarpophalangeal joint.

**WALKING AIDS EASY TO HOLD**

**INDICATIONS**

Post-operative, post-traumatic, rhizarthritis, degenerative, inflammatory, i. e. arthritis, ulnar/radial ligament injury of the thumb

**Profile**

**BORT Generation Thumb Splint**

Circumference of wrist

BORT. Benefit at your side.
BORT Generation Thumb-Wrist Brace
Practical lacing enables easy handling

**INDICATIONS**
Pre-operative, post-traumatic, post-operative, i.e. after thumb ligament reconstruction, immobilisation in the case of rheumatic-inflammatory processes, i.e. rhizarthrosis, in the case of degenerative diseases such as carpal tunnel syndrome.

**MEASURING POINT**
Circumference of wrist

**SIZES**
- up to 15 cm: x-small
- 15 – 17 cm: small
- 17 – 19 cm: medium
- 19 – 21 cm: large
- 21 – 23 cm: x-large

**INNOVATIVE CORD LACING SYSTEM**
Easy and safe handling using little force for circumferential closure; compensates reduced gripping strength for the elderly.

**EXTRA SAFE HOLD**
Variably adjustable area, suitable for various forearm circumferences.

1 cm = 0.3937 inch
BORT Generation Wrist Brace

Due to its innovative tie-strap, it can be applied using one hand.

**PADDING**
Additional padding in the palm area and on the ball of the thumb enables comfortable wearing, also combined with walking aids.

**CIRCUMFERENTIAL STABILLO STRAP/FORK CURBING**
The closure mechanism can be operated safely using one hand. A wide Velcro contact area enables adaptation to various wrist and forearm circumferences.

**APPROPRIATE FOR USE WITH WALKING AIDS**

**INDICATIONS**
Pre-operative, post-operative, post-traumatic, carpal arthrosis, inflammatory-rheumatic, degenerative diseases, e.g. carpal tunnel syndrome (CTS), tenosynovitis, peripheral nerve paralysis.

BORT Generation Back Support
Light support with a pulley system for energy-saving putting on

VISCOELASTIC AND SPLIT SACRAL PADS
Individual fitting in the lumbar spine region; Padding enables better fitting and precise regionally accurate/pinpointed support for the lumbar spine; Depending on the body size fitting at the optimum pressure point.

ENERGY-SAVING PULLEY SYSTEM
Introduction of the strap system from both sides enables finely adjustable and particularly effortless fitting of the back support.

VERY LIGHT AND LOW-THICKNESS SUPPORT STRUCTURE
Easier to put on using the ergonomic latch plate. Comfortable to wear as lightweight, breathable material.

BORT Generation Back Support
REF 215 850

MEASURING POINT
Circumference of waist

INDICATIONS
Degenerative lumbar change, mild to moderate lumboischialgia, slipped disc with mild deficits, spondylosis, spondylolisthesis, spinal canal stenoses, radicular irritation syndrome, condition after inter-vertebral disc surgery.

MEASURING POINT
Circumference of waist

INDICATIONS
Facet syndrome, lumbosciatica, intervertebral disc protrusions/prolapse, radicular irritation syndrome, degenerative lumbar change, condition after inter-vertebral disc surgery, stable fractures, spondylolisthesis, spinal canal stenoses
BORT Generation Dynamic Osteoporosis Brace
Adaptable to the course of therapy: from the acute to the rehabilitation phase

- **Removable Limitation Restraints**
  - The removal can enable the realisation of dynamic reclination during the rehabilitation phase.

- **Padded Shoulder Straps**
  - Shoulder strap with guidance fasteners for reclination eases putting it on and removing it without expending much force.

- **Guidance of the Shoulder Straps**
  - Elastically held shoulder straps for better rotational freedom of movement.

- **Two-Part Aluminium Back Splint**
  - Adaptable back splint for stabilisation and activation, enables stable and dynamic adjustability of the brace.

BORT. Benefit at your side.
BORT Generation Dynamic Osteoporosis Brace

INDICATIONS
Active straightening for relief and correction of the lumbar/thoracic spine associated with restricted movement in the sagittal plane, stable, osteoporotic vertebral fractures, osteoporosis, cautionary treatment of secondary kyphosis (stable fractures, tumors) muscular insufficiency, pre-operative and post-operative stabilisation

MEASURING POINT
Back length
L = C7 til gluteal fold

PRODUCT-BENEFIT
- Activating and spine-straightening back brace
- Back splint and limitation restraint, stable and dynamically adjustable
- Two-part, stable aluminium back splint, anatomically pre-shaped and individually adjustable without tools
- Relief and stabilisation of the lumbar spine
- Active straightening by activating the back muscles

THE GENERATION-BENEFIT
- Strap system according to the rucksack principle
- Guide loops in the chest area for easy, stepless straightening of the upper body
- Lightweight and slim structure for good wearing comfort
- Fastener with a large finger hold and hand straps for effortless fitting

COLOUR: blue

Back length SIZES
up to 43 cm x-small
44 – 49 cm small
50 – 55 cm medium
56 – 61 cm large
62 – 67 cm x-large

1 cm = 0,3937 inch

NEW
BORT Generation Osteoporosis Brace
For relief and stabilisation of the lumbar spine

VENTRAL PLATE

Extensive Velcro and velour surfaces as well as grip pockets make it easier to close and optimise the fitting of the brace, which can be put on independently, applying very little force.

HIP BELTS

With individual length adjustment, crocodile clasp ends enable correct setting of the brace. The brace is prevented from slipping to the upper body.

VELCRO FASTENING

GUIDE FASTENERS FOR RECLINATION

As for a rucksack, they make it easier to put on and take off. The strap strength for reclination (straightening) can be adapted without expending much force.

BORT. Benefit at your side.
**INDICATIONS**

Active straightening for relief and correction of the lumbar/thoracic spine associated with restricted movement in the sagittal plane, stable, osteoporotic vertebral fractures, osteoporosis, cautionary treatment of secondary kyphosis (stable fractures, tumors) muscular insufficiency, pre-operative and post-operative stabilisation.

Hallux valgus, after hallux surgery to ensure the success of treatment, post-operative capsule relief
BORT Generation.
The product range with particularly easy handling

**BORT Generation Thumb Splint**
Soft brace for immobilisation of the metacarpophalangeal joint and saddle joint of the thumb with soft inner padding and practical lacing for easy, safe handling. For use in case of rhizarthrosis, arthritis or ulnar/radial thumb ligament injuries.

**BORT Generation Back Support**
Back support for stabilisation of the lumbar spine using integrated stabilisation elements. For use in case of mild to moderate lumbar-sciatica, slipped disc with mild deficits, or following slipped disc operations.

**BORT Generation Thumb-Wrist Brace**
Wrist brace with additional immobilisation of the metacarpophalangeal joint and saddle joint of the thumb with soft inner padding and practical lacing for easy, safe handling. For example, after thumb ligament reconstruction and immobilisation in case of rheumatic-inflammatory processes.

**BORT Generation Back Brace**
Spinal brace for relief and stabilisation of the lumbar spine thanks to integrated plastic pelvic girdle in case of disc protrusions/prolapse, degenerative lumbar change or following slipped disc operations.

**BORT Generation Wrist Brace**
Padded wrist brace with palm and dorsal reinforcement. Innovative strapping fastening makes it easy to put on. For carpal arthrosis, inflammatory-rheumatic, degenerative diseases.

**BORT Generation Hip Protector**
Hip protection belt with a shock absorbing effect and removable protectors for use in cases of tendency to fall for various reasons or danger of falling.

BORT. Benefit at your side.
**BORT Generation Osteoporosis Brace**  
Activating and spine-straightening back brace with a stable aluminium back splint and an integrated strap system according to the rucksack principle. For active straightening and relief of the lumbar spine/thoracic spine with restricted movement in the sagittal plane, e.g. in case of stable, osteoporotic vertebral fractures.

**BORT Generation Knee Brace**  
Soft brace with movement limitation for guiding the knee joint and reducing the burden on it. For treatment in case of degenerative diseases, e.g. slight to moderate ligament instability of the knee joint, gonarthrosis or meniscus injuries.

**BORT Generation Soft OA Knee Brace**  
Soft relief brace for isolated medial/lateral gonarthrosis with an adjustable, polycentric joint. For partial relief of the medial or lateral compartment and post-operative care following tibial plateau fracture.

**BORT Generation Knee Support**  
Knee support for the guidance and stabilisation of the knee joint with adjustable thigh width, for gonarthrosis treatment, recurrent articular effusion, arthritis or slight ligament instability.

**BORT Generation Knee Support Plus**  
Knee support for guidance and stabilisation of the knee joint with adjustable thigh width, grip pads and circular sealing tape. For gonarthrosis treatment, recurrent articular effusion, arthritis or slight ligament instability.

**BORT Generation Dynamic Osteoporosis Brace**  
Activating and spine-straightening back brace with a two-part, stable aluminium back splint and integrated strap system according to the rucksack principle. Shoulder strap and back splint are stable and dynamically adjustable. For active straightening and relief of the lumbar spine/thoracic spine with restricted movement in the sagittal plane.
**BORT Generation Ankle Support**
High quality active ankle support for compression of soft tissue with a highly elastic stretch zone in the sensitive instep area. Easy to adjust and fix the support thanks to its Velcro fastenings. For use in case of ligament weakness, after removal of plaster cast, ligament lesions and arthrosis.

**BORT Generation Hallux Valgus Splint**
Soft brace for corrective or postoperative stabilisation of the large toe and the metatarsophalangeal joint. After hallux surgery to ensure the success of treatment or post-operative capsule relief.
PARTICULARLY EASY TO HANDLE

The supports and braces are easy to fit without third-party help, providing more independence in everyday life.

PARTICULARLY SAFE APPLICATION

The functional design with its visual contrasts supports the correct fitting of the aids.

VERY COMFORTABLE TO WEAR

Its soft material and pleasant haptics increase the wearer’s acceptance.
The Generation Benefit from BORT.

- Easy handling for more independence
- Safe application due to clear marking
- Support without limits
- Comfortable to wear

Your competent partner in the provision of BORT supports and braces
