# Looks different, feels better

## Functionality meets modern design

BORT stands for first-class quality medical aids.

The BORT sports series supports were developed specially for dynamic active use on the elbow, the hand, back, knee and ankle joint.

Their modern, sporty design and innovative features make the products more than merely therapeutic aids. Functional high-tech fibres, a comfortable fastening system and the soft, velvety knitted fabric with a 3D look transform the supports into attractive products with maximum functionality.

### The features benefit

The reflecting label as a plus sign marks all BORT sports products, ensuring increased safety.

**BORT. Benefit at your side.**

## Stylish SOFTflex 3D knitted fabric

Elastic, flexible, stable and pleasant on the skin: the new SOFTflex 3D knitted fabric provides the BORT sports series supports with a trendy, sporty look – ideal for the active moments in life.

- ⊕ SOFTflex 3D knitted fabric with a velvety soft surface structure
- ⊕ For more elasticity, stability and very comfortable to wear
- ⊕ A secure hold, also during intense physical activity

## High-tech fibre **COOLMAX®**

Soft, lightweight and breathable – **COOLMAX®** regulates body heat and ensures dry and pleasant wearing comfort.

- ⊕ Transports moisture away from the body
- ⊕ Dries fast
- ⊕ Particularly easy to clean

**COOLMAX®** is a trademark of The Lycra Company.

# Positioned in a jiffy

## The innovative Stabilo strap with the easyClick System

BORT sports supports convince with a new fastening system which is also marked by its particularly high degree of functionality. The easy handling of the Stabilo strap with the easyClick System enables fast, comfortable positioning. At the same time, the extent of stabilisation and pad pressure can be set precisely and individually.

### Really easy to adjust individually

The Velcro-free fastening system consists of four compatible function modules which guarantee easy fixing and setting.

1. Positioning of the support. Attach the flexible Stabilo strap.

2. Adjust the Stabilo strap to adapt the extent of stabilisation on the wrist or the pad pressure on the elbow.

3. Fix the Stabilo strap using the easyClick System.

### The innovative Stabilo strap with the easyClick System for elbow and hand products:

**The result:** a perfect fit for all sports activities.

**The sporty side of BORT.**

# BORT sports supports for the elbow

## BORT EpiContur Sport

Epicondylitis soft clasp for relieving the radial or ulnar muscle origin. Standard size adjustable to individual circumferences using Velcro fastening. Specially shaped friction pad, freely positionable. Latex-free.
